# [Duties of Production Facility Quality Representative Standard]

## [Core]

## 1 General Provisions

## 1.1 Purpose

The purpose of this standard is to ensure appropriate and smooth implementation of activities of the quality representative, who supervises the facility's quality management activities, by clarifying its duties

## 1.2 Scope

This standard applies to the quality representative of the facility manufacturing products (includes parts; the same applies hereinafter).

#### 1.3 Definition of Terms

Definition of terms used in this standard are as follows:

No.	Term	Definition
1	Quality Representative	A person who holds authority and responsibility as the top quality executive of the production facility.
2	Report	To convey decisions, implementation status, obtained information by means of documents, verbal communication, etc.
3	Confirmation	The act by an authorized person to agree or accept upon assessing whether the decision has been made as the rule, whether it has been implemented or decided as instructed with the necessary instructions, when receives notification of decisions or implementations made by another.
4	Approval	The act of making decisions, providing instructions or permissions as one' account by taking into consideration of the circumstances and facts.
5	Completion Inspection	An inspection to make judgments on whether or not the completed products are ready for shipping by verifying that the products conform to their respective inspection criteria through 100% or sampling inspection.

## 2 Responsibility and Authority

#### 2.1 Responsibility

The quality representative of the facility is responsible for quality assurance of all products, parts and equipment shipped by the facility.

The quality representative is also responsible for taking appropriate measures to maintain stable quality at all times.

## 2.2 Authority

- 2.2.1 The quality representative has the authority to manage the facility for quality assurance of products being shipped by the facility and to ensure the quality assurance is implemented.
- 2.2.2 The quality representative is responsible for duties described in Attachment-1 "Key Duties of Quality Representative."

## 2.3 Delegation of Authority

- 2.3.1 If necessary, the quality representative may assign some assistants in order to perform his/her roles and responsibilities.
- 2.3.2 The quality representative may delegate his/her authority to the selected assistant(s).
- 2.3.3 The quality representative clarifies the duties to be delegated and holds supervising responsibility, when delegating his/her authority to the assistant(s).
- 2.3.4 The assistant(s) delegated the authority by the quality representative reports the conducting progress of the delegated duties in a timely manner.

## 3 Supplementary Provision

## 3.1 Application of the Standard

Matters relating to establishment, revision and implementation of this standard are outlined in G-HQS [Quality Management Standards Control Standard].

Attachment-1 (related to section 2.2)

# Key Duties of Quality Representative

[Japan Option]

## 1 General Provisions

# 1.1 Purpose

The purpose of this standard is to clarify the duties of the quality representative in order to produce motor vehicles complying with the requirements of Japan's Road Vehicles Act.

## 1.2 Definitions of Terms

Definitions of terms used in this standard are as follows:

No.	Term	Definition
1	Chief Inspecting Engineer	A person assigned as quality representative of the facility, implementing completion inspections of type-designated motor vehicles.
2	Type designated motor vehicle	Any motor vehicles which the type is designated by the minister of land, infrastructure and transport. Based on the Road Vehicles Act in Japan, it has been judged as to conform to Safety Regulations for Road Vehicles and to have uniformity.
		<example> Ordinary-sized motor vehicle, small-sized motor vehicle, mini-sized motor vehicle (excluding two-wheeled motor vehicle with displacement 250cc and under), etc.</example>
3	Type-certified motor Vehicle	Motor vehicle (includes motor bicycle; the same applies for "Type certified motor vehicle"), applied based on Enforcement Regulations for Road Vehicles Act (Ministry of Transport Ordinance No. 74 of 1951), that conforms to Safety Regulations for Road Vehicles, determined to be uniform, and of which its type has been certified by the Minister of Land, Infrastructure, Transport and Tourism.
		<example> Mini-sized motor vehicle (two-wheeled motor vehicle), motor bicycle, small-sized special motor vehicle.</example>
4	Completion Inspection	Inspection to judge whether completed products are ready for shipping by verifying product conformity with inspection criteria through 100% or sampling inspections.
		The following have been specifically added for type-designated motor vehicles.
		(1) Those that has the same structure, device and performance as the approved type motor vehicle.
		(2) Those that conforms to safety and environmental laws and regulations of Japan and are in uniform quality.
		(3) Vehicle Identification Number, engine type, etc. are clearly and legibly stamped.

## 2 Responsibility and Authority

## 2.1 Responsibility

The Chief Inspecting Engineer of the facility manages and supervises duties associated with the Road Vehicles Act in the facility in order to ensure thorough implementation of the duties.

## 2.2 Authority

- 2.2.1 Chief Inspecting Engineer manages and represents the facility on the following:
  - (1) Duties related to Completion Inspection
  - (2) Duties related to notifying authorities
  - (3) Duties related to Completion Inspection Certificate stipulated in Article 75 of the Road Vehicles Act and Exhaust Gas Inspection Certificate stipulated in Article 63 of the Enforcement Regulations for the said Act.
- 2.2.2 The Chief Inspecting Engineer is responsible for duties described in Attachment-2 "Duties of Chief Inspecting Engineer".

Attachment-2 (related to section 2.2)

# Key Duties of Chief Inspecting Engineer

			Res	ponsi	bility
